

The Difference is clear: “V” ZUH bags promote rock product “visi”bility for end-users

When you need custom poly bags to present your decorative rock products at their best, clarity and strength are probably at the top of your must-have list. Look no further: Tough “V” ZUH film™ bags from PolyPak America are tough and durable, and provide the right “visi”bility so your product shines through.

PolyPak’s clear “V” ZUH film™ is made from a top-notch blend and is known throughout the industry for its remarkable strength, excellent clarity and gloss. Customers can depend on a very low incident rate and reliable delivery with “V” ZUH film™, and know that PolyPak quality and service is “in the bag”.

“V” ZUH’s polyethylene film is a highly successful application for deco rock, lava rock and pea gravel. Designed for excellent sealability, these puncture-resistant bags perform under tough conditions – whether dusty or damp. Their non-skid surfaces are ideal for palletizing and safe shipping.

PolyPak can custom print your decorative rock bags in up to 8 colors on one side or both sides if you desire. Other outstanding features include:

- UV protection film up to 6 months
- Extreme impact strength
- Excellent puncture resistance
- High Seal ability
- Low creep or stretch
- Any colored plastic available with a terrific glossy appearance
- Non-slip surface and easy to open
- Fade and scratch resistant inks
- Custom sizes and colors available
